Camp-Specific Schedules & Information

Music Technology & Music Business Camp Details

1. During the camp week, campers share/email the projects using our Dropbox folder or Google drives. Also each camper will be using the same computer all week. They usually send files to themselves throughout the week as they work on them and before they leave. Most campers save it to their Google drive many times throughout the week as they move between the computer labs and the recording studio. Not having their files is not an issue.
2. Campers will complete both individual projects and group projects. By the end of the week usually everyone works in groups as that's the most fun when campers with various talents collaborate with each other. This is fluid throughout the week though as people make friends, collaborate, etc. Some people work better alone or in pairs, and some people work with 5 other campers. It depends on their level of comfort and what they project needs. If someone needs a singer on their track we pair them with a singer. If they want drums or bass on their song, that's what we record with them as a group. If they don't need anything they might work on their own most of the time and they have a chance to play their music in front of the group to receive feedback and support for improvement, etc. Some campers work in 4 different groups because everyone wants them to sing/play on their track. It's very flexible. Campers have a blast together in the recording studio!
3. Campers will have at least one project done by the end of the week that could be presented in their college application. The Music Technology & Music Business Camp is not a bootcamp to prep for a college application. The [Rowan Community Music School](#) offers [one on one private lessons](#) in music technology virtual and in person. Lessons are a quality outlet to best prepare for college applications and portfolios. Campers will know enough content after camp to be able to work by themselves and expand the amount of material they have for their college applications. The college application should represent what individuals complete and accomplish on their own.

Band Camp Specific information

Band campers do not need to bring a prepared piece with them. Instead, each camper will have a very short/informal placement audition; each camper will be asked to play 3 scales for one of our counselors: Concert Bb, Concert F, and Chromatic scales (in any pattern you like, however many octaves they are comfortable with). Campers may also be asked to sightread a short melody. This is a short, low-stress “audition” that will simply help Dr. Higgins to assign ensemble parts. Rather than audition, camper percussionists will instead have a conversation with our percussion counselor about what instruments/parts they are comfortable playing.
